# Environmental Fact Sheet

## Water:

There are two ways to reduce the impact of paper production on watercourses: reduction of water consumption in the production process and improvement of effluent treatment. Both methods are used.

## Air:

The mill experienced a noticeable fall in emissions in comparison with production and turnover. During the period 1995-2003, there was a reduction of 26% in total emissions per average tonne of production due to changes in technology.
